Summary

Software Engineer building enterprise web platforms with React, Python (FastAPI), PostgreSQL and Oracle DB: API design, database optimization, ETL pipelines and Agile delivery for large-scale analytics and high-concurrency systems. Builds LLM-powered applications with RAG and LangChain.

Education

Dr. A.P.J. Abdul Kalam Technical University (JSS Academy, Noida)

B.Tech. in Computer Science (Data Science) — GPA: 8.77

Uttar Pradesh, India

Aug 2022 – May 2026

Experience

Associate Software Developer

Antino Labs Pvt. Ltd.

Jan 2026 – Present

Gurugram, India

- Develop and maintain enterprise-grade web applications using React, FastAPI and PostgreSQL in an Agile/Scrum team (sprint planning, stand-ups, retrospectives).
- Design and develop RESTful APIs and optimize database queries, improving application response time.
- Collaborate with product, design and QA teams to translate business requirements into scalable software features.

Cyber Security Intern

Redynox

Jul 2025 – Aug 2025

Remote

- Detected and analyzed security vulnerabilities, including SQL Injection, XSS and CSRF, across multiple test environments.
- Performed penetration testing and simulated attack scenarios using OWASP ZAP and WebGoat to reduce the exploitable attack surface.
- Documented findings and remediation steps, strengthening secure coding practices.

Projects

Operational Data Platform (Confidential Client) | *React, Python (FastAPI), Oracle DB*

May 2026 – Present

- Building a high-scale web application that manages operational data for a large user base.
- Developing a responsive React frontend and a FastAPI backend that handle high-concurrency requests.
- Designing Oracle Database schemas and implementing role-based access control to store critical data securely and reliably at scale.

GMR Analytics – Smart Meter Analytics Platform | *React, FastAPI, PostgreSQL, ETL*

Jan 2026 – May 2026

- Contributed to a platform tracking meter installation, SAT (Site Acceptance Testing) and revenue data across 30 lakh+ meter installations.
- Built interactive React dashboards for KPIs (MI vs SAT vs Invoice, revenue status), reducing manual reporting effort.
- Developed FastAPI backend services and ETL pipelines, and optimized PostgreSQL queries on large datasets to speed up data processing and report generation.

SpeakEase – AI Voice Assistant | *Next.js, TypeScript, Gemini API, NextAuth*

- Voice assistant that converts speech to text in the browser, generates replies with Google Gemini and supports Google sign-in; deployed on Netlify.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, Tailwind CSS, scikit-learn

Databases & Cloud: PostgreSQL, Oracle DB, MongoDB, AWS, Docker

AI/ML: Generative AI, LLMs, LangChain, RAG

Tools & Practices: Git, Postman, CI/CD, Agile/Scrum, RESTful APIs, GraphQL, ETL pipelines, Microservices

Achievements & Activities

- Solved 300+ algorithmic problems on LeetCode and GeeksforGeeks.
- Ranked 3rd in academic performance in the department; AKTU State-Level Gold Medalist (4x100m relay) and Bronze Medalist (100m).
- Led a 15+ member college cricket team; active in event management and public speaking.
